CSST

## Company Information

China Security & Surveillance Technology, Inc. (CSST) is a leading safety and surveillance technology company in China. We offer a unique foundation of agile and reliable products and solutions providing customers a sustainable advantage in the industries they serve. CSST is headquartered in Shenzhen and listed in NYSE.

During the past decade, we have grown and evolved, both organically and through acquisitions. Many leading safety and surveillance brands have joined CSST, such as Longhorn, Mingking and Stonesonic. Yet through it all, we have maintained our commitment to providing customers with cutting edge products and solutions. That is why CSST is a dedicated safety and surveillance solution provider for the life of your business.

We mainly provide installation and implementation of safety and surveillance systems in China, serving government bodies and corporate customers. Our business also covers manufacturing, distribution, software, education and the high-growth service business.

## Mission

We work toward a single goal: to help our customers protect their own assets. We provide customers with products and solutions, helping them install and implement safety systems. We strive to be more than just another vendor. Our goal is to become a strategic addition to your business.

We understand mainland customers' need to keep your people, premises, assets and intellectual property – the lifeblood of your organization – safe and secure.

## Business Overview

CSST can trace its roots back to 2001, when Chairman and Chief Executive Officer Guoshen Tu founded the Company. CSST then expanded its presence in China offering a suite of products and solutions in China. In 2005, the Company was listed in OTCBB via a reverse takeover. The Company was then listed in the NYSE in 2007.

CSST prides itself with its full suite of products, solutions and services. CSST engages in ten function areas including installation, manufacturing, software and solutions, system integration, service, distribution and alike.

The core business of CSST lies in installation division. CSST mainly provides surveillance and safety system installation for government and corporate entities. For government sector, CSST focuses on large-scale government projects in safe cities and e-cities, helping to install and manage the safety and surveillance system in those cities.

CSST is one of the largest surveillance and safety related equipment manufacturers in China. We manufacture key components in the surveillance and safety sector (DVR, cameras, access control and intruder alarm, monitors, etc). We also have an extensive network throughout China to distribute our CSST's own branded products as well as other international brands and Chinese brands through specialized retail outlets. We also provide the software platform to help the customers manage the system to deliver enhanced efficiency in data management, processing and interpretation.

To move up the value chain, we strive to expand our service division which provides a full range of security services including network alarm response, post-sale maintenance for surveillance and safety products and solutions, software upgrading, project integration, security guarding, surveillance and safety consulting and trustee services.

CSST places huge emphasis on people and professional development. We run the first professional surveillance and safety training institute in China. We also collaborate with the government to improve standards of the surveillance and safety personnel in China. We are honored as the official contractor for the safety guard training for Shenzhen Public Security Bureau.

CSST R&D institute was established in October 2007. The institute has built strategic collaboration with Shenzhen Research Institute of Beijing University, National Media Software Engineering Technology Institute of Wuhan University and several other outstanding research institutes. CSST R&D institute functions in the research of E-city, Internet of Things and industry-related technologies.
